

Customer Journey Map

Date	29 June 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions What does the customer do?	- Opens the web app and enters financial details - Selects income type and employment status - Clicks submit to send the request	- Views the instant ML approval prediction - Checks if result is Approved or Rejected - Reads the reason shown on screen	- Decides whether to apply at the bank - Saves the ML result for future reference - Contacts bank if the result is favorable
Touchpoint What part of the service do they interact with?	- Flask web app data entry form - Income and credit history input fields - Submit button on the web interface	- ML model prediction engine - Result display page on Flask UI - IBM Watson ML cloud service	- Bank's official credit card portal - Downloadable prediction result file - Customer support contact page
Customer Thought What is the customer thinking?	- Will my income qualify me for approval? - Is it safe to enter my data here? - How reliable is this ML system?	- Why was I approved or rejected? - Is this result same as a bank decision? - Can I fully trust this prediction?	- Should I apply at the bank now? - What if the bank decides differently? - How can I improve my credit profile?
Customer Feeling What is the customer feeling?	- Anxious about sharing financial data - Curious if the system will be accurate - Hopeful for a positive prediction	- Relieved to get an instant result - Satisfied with a clear approval output - Frustrated if rejected with no reason	- Confident when result meets expectation - Excited to proceed with bank application - Uncertain if ML result differs from bank
